

Crawler Dozer Chip Blade

The Chip Blade is used primarily in the Pulp and Paper industry for the stockpiling of wood chips.

These high capacity U-blades are designed to increase productivity through efficient moldboard curvature and improved carrying capability and match machine specifications.

FEATURES AND BENEFITS:

- Available in OEM hook-up configuration
- Optimum moldboard curvature to maximize carrying capacity and minimize material overflow
- Maximum ground clearance to enable quick loading
- Comes with replaceable, bolt-on edges
- Smooth back design minimizes interference from 'push fan' airstream
