

High Capacity Blades

Kenco's High Capacity Blades are designed to meet and exceed the demands of dozer mining customers. The unique combination of size, strength, and weight achieves outstanding productivity and low maintenance costs.

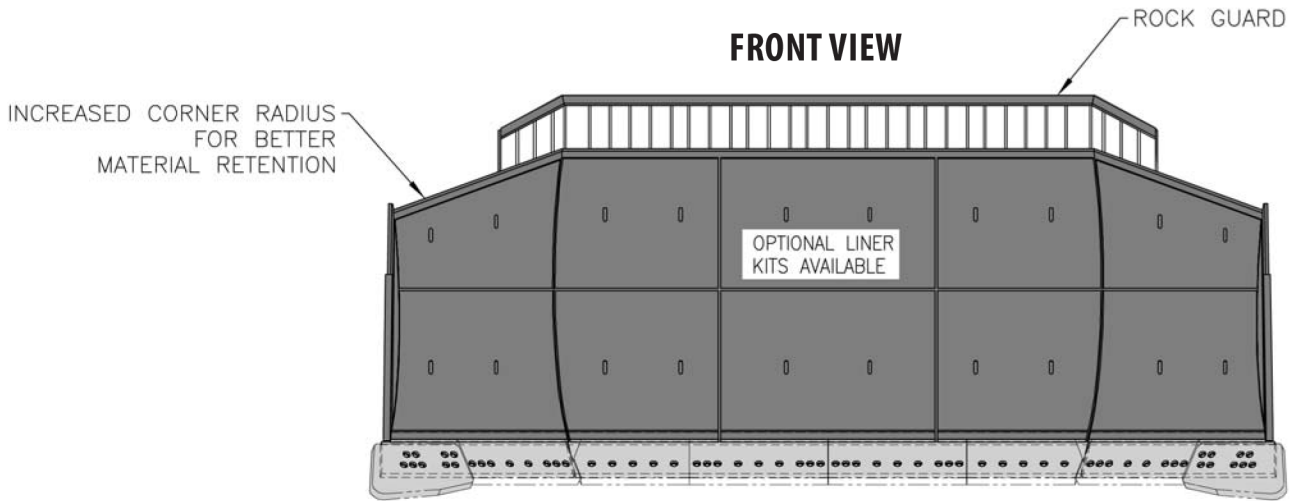

FEATURES & BENEFITS:

- Optimum moldboard curvature maximizes carrying capacity
- Aggressive cutting edge angle and under blade clearance for fast penetration and blade filling
- Standard OEM hook up allows machine and blade interchangeability

OPTIONS:

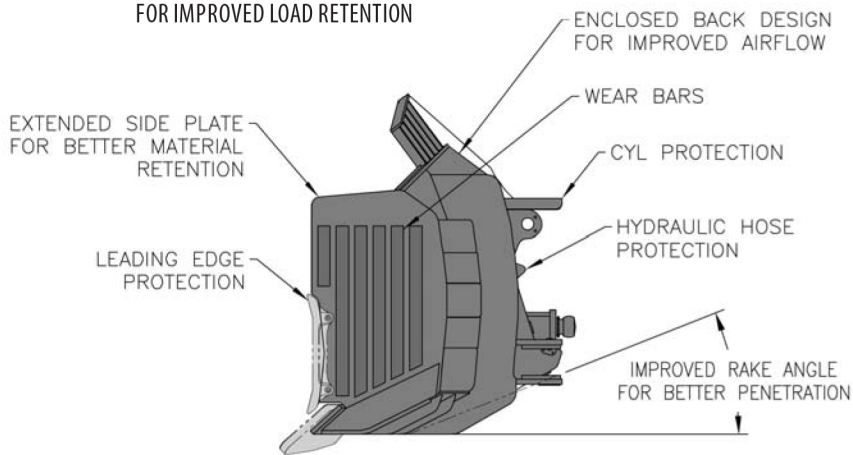

- OEM original or aftermarket GET
- Wear packages to suit application (liner packages and shrouding)
- Centralized greasing
- Heavy-duty rock guard/spill guard
- Custom designed to match machine capacity and application
